

# PC 1

# PARAMETER CONTROLLER

#### **Overview**

The PC1 is a wall-mount control panel that acts as a remote-control device for the Keyer Series of DSPs. It can be customized to suit various applications like processor volume or switching application scenes, mixing matrix, and other functions. It communicates with the DSP unit through UDP commands on standard network cable Cat5e or Cat6 & can be powered up through a POE switch on the same cable.

## **Key Features**

- Fully customizable front panel knob to adjust various parameters of DSP it is connected to.
- Works on UDP protocol through standard network cable.
- Powered by POE switch so no need of separate power cable or supply unit.

### **Technical Specifications**

| OPERATING TE <b>M</b> PERATURE | -10 TO 40                       |
|--------------------------------|---------------------------------|
| OPERATING POWER                | POE (IEEE 802.3AF)              |
| IP CONTROL                     | UDP                             |
| CONTROL CABLE                  | RJ-45 (CAT 5/6/7 NETWORK CABLE) |
| CONTROL LINE LENGTH            | ≤100 <b>M</b>                   |
| SCREEN SIZE                    | 1.3                             |
| CONTROL KNOB                   | 1个                              |
| MATERIAL                       | ALUMINUM ALLOY SANDBLASTING     |
| COLOR                          | BLACK                           |
| DIMENSION                      | 86MM*25.65MM*105MM              |
